Innovative
Fall Protection

Products

FrogLink®

Metal/Ply Roof Anchor

- Energy absorbing.
- Multi directional 316 stainless steel, surface mounted anchor.
- One single row of attachment holes.
- Secured with seven Bulbtite Rivets on metal roofs.
- Secured with seven 14g 75mm roofing screws for ply roofs.
- Fast installation, rated as a one person anchor.
- Dynamic design reduces the load back onto the structure and person attached to the anchor.
- Discrete Design.

Fixed LadderLink™

Ladder Stabiliser

- Made from marine grade aluminium.
- Quick and easy installation.
- Essential entry point system to stabilise your ladder.
- Stabilises your ladder preventing sideways movement.
- Two tie off points to aid in securing the ladder position.
- Enquire after the NEW Ladder Restraint Strap which secures Ladder to LadderLink.
- Australian Made.

SafetyLink is an innovative anchor company achieving success and keeping you safe whilst working at heights.

FrogLine™

Horizontal Lifeline

- Patented low profile design.
- Fast simplified installation.
- Advanced shock absorbing serpentine.
- Innovative built-in fall indicators.
- Solid 316 stainless steel components.
- Quick connect shuttle.
- Smooth transition over intermediates.
- Dynamic design reduces the load back onto the structure and person attached to the anchor.

FrogLine™ SurfaceLink

FrogLine™ ConcreteLink

FrogLine™ RetroLink with extender

Renewable energy sources such as solar are a smart popular solution to reducing your maintenance costs. This modern day technology is great, however installing these systems or maintaining these systems poses a number of working at heights risks. Are you complying with current building safety requirements, ensuring safety standards are maintained throughout? Is your customer's roof safe?

Most solar manufacturers recommend cleaning solar panels twice a year, this results in a 3 to 5% efficiency. With SafetyLink's innovative fall protection installed you can achieve this efficiency by maintaining solar systems safely and as per current building standards.

SafetyLink's compact energy absorbing anchors and lifelines are the perfect fit to any solar system. Our low profile, multi-directional and discrete systems can be placed into the desired location enabling safe access as per current building standards to the entire solar system.

A fall is never an anticipated event when working at heights, therefore the direction of your fall cannot be accurately predicted. Keep your workers and your customers safe, install a SafetyLink anchor system!

SafetyLink has an multitude of roof anchors and lifeline systems to suit many scenarios, enquire about the right anchor for your job!

ROOF ANCHORS

LIFELINE SYSTEMS

PERMANENT LADDERS

LADDER STABILISERS

SafetyLink's dedicated design team have been working vigorously over the past decade, creating a multitude of new products to suit any working at heights scenario.

Our team of engineers have created a quality tested product to suit any solar panel installation. Ensuring maintenance is carried out safely and constructively.

Benefits of choosing SafetyLink:

SafetyLink supply all height safety equipment to all industries - buildings, commercial and industrial sites. From a series of anchor points to a complete network of systems for maintenance, cleaning access and inspections, SafetyLink has you covered.

All SafetyLink products undergo extensive testing in a multitude of scenarios by accredited testing facilities and comply to current Standards.

SafetyLink's experienced technical team is complemented with comprehensive installation manuals and testing certificates. We have global qualified installers keeping your assets safe.

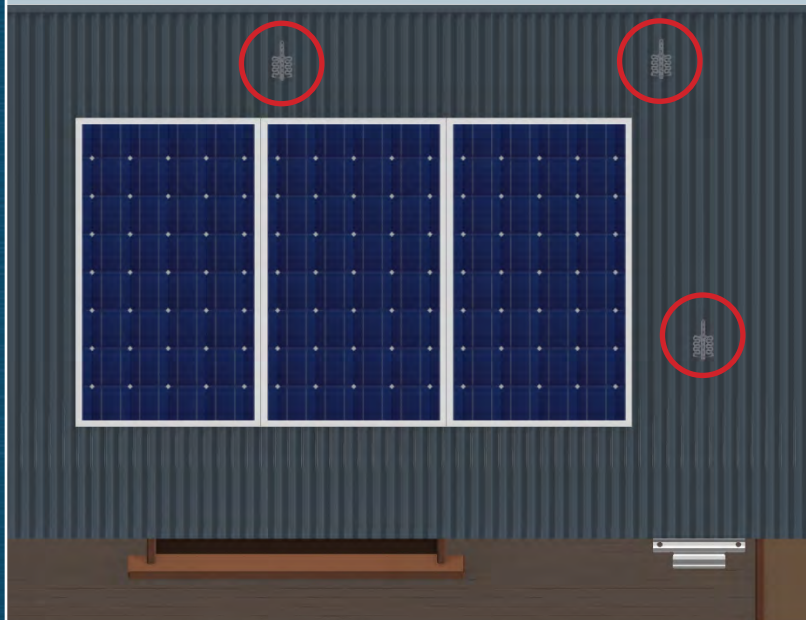

SafetyLink's Catalogue

SafetyLink will provide you with the following:

- All products tested and manufactured to the highest industry standards.
- All distributors and installers are trained to use SafetyLink products.
- Supply installation guides, testing results and product sheets.
- Use a qualified and reputable testing authority.
- Supply a large range of roof anchors that protect you from the ground up, allowing complete access to your roof.
- Installers are qualified to do yearly inspections on your anchor systems.
