

CONCRETELINK

Concrete Mounted Anchor

- ConcreteLink anchor with SafetyLink's Abseiling Eyebolt is a fall arrest rope access anchor.
- The tapered concept enables the eyebolt to withstand a live load without activating the bending motion that occurs when arresting a fall.
- Must be chemically fastened, recommended chemical is Fischer FIS-V.

STANDARDS

Complies with AS/NZS 1891.4, AS/NZS 5532-2013 and EN 795:2012.

WHAT AM I USED FOR?

A height safety anchor point designed for use in concrete, where the eyebolt will remain exposed for attachment. The building or structure for the anchorages must be assessed by an engineer, unless it is clear to a competent person that the structure is adequate.

COMPLETE UNIT - PRODUCT CODE: CONCL001

Product Parts	Description	Qty	Weight (kg)	Material
CON-INSERT	Concrete Insert	1	0.217	316 Stainless Steel
EYEBOLT-ABSEIL	Abseil Eyebolt	1	0.220	316 Stainless Steel
NUT M16	Nut: 16mm	1	0.029	316 Stainless Steel
			0.446	

Testing for concrete mounted anchor.

To comply with current Standards each Concrete unit must be tested after installation. Allow required curing time as specified in manual before testing. Test consists of pull out force to 50% of design load of anchorage. **Note: Drilled-in anchorages such as friction and glued-in anchorages shall be placed so that the shear load is at least twice the tension load. For collared eyebolts this translates to a pull at an angle not exceeding 20 degrees to the surface in which the bolt is installed.**

All products must be installed in accordance with SafetyLink's installation handbook, using only products supplied by SafetyLink Pty Ltd.
