SafetyLink's **PigLink** Rope Guide

Manage your rope line when working at heights with SafetyLink's PigLink Rope Guide.

SafetyLink's PigLink is a Lateral Restraint for guiding ropes on a long descent.

-  316 Stainless Steel.
-  Can be used for Concrete and Steel structures.
-  PigLink's should be installed at intervals of between 20m and 30m to restrain an abseiler's rope lateral movement. Depending on the application, smaller intervals may be required.

* The PigLink is NOT a single point anchor or load rated.

SafetyLink will provide you with the following:

-  All products tested and manufactured to the current Standards.
-  All distributors and installers are trained to use SafetyLink products.
-  Supply installation guides, testing results and product sheets.
-  Layout Design Service providing compliant roof safety systems.
-  Supply a large range of roof anchors that protect you from the ground up, allowing complete access to your roof.
-  Installers are qualified to do yearly inspections on your anchors as per the current Standards.
