150mm
Cast-In-Cage

300, 600 and
900mm
Cast-In-Cage

SafetyLink's Cast In Cage with **TUFF-POST**

Reach new heights with SafetyLink's Cast-In-Cages designed for the 150mm, 300mm, 600mm and 900mm **TUFF-POST**. SafetyLink's Cast-In Cages enable your height safety system to be installed from the start of construction.

Cast-In Cages are concrete studs set at the correct spacing for different products. The cages are to be installed prior to the concrete being poured. Save time and money by eliminating the need for pull testing during installation or re-certification.

The **TUFF-POST** raises the height of the system enabling the system to protrude above garden beds, parapet walls, solar panels, air conditioning systems and any other obstacles located on the roof. This enables the user or users to walk freely, reducing entanglement with obstacles.

- For use with SafetyLink 150mm, 300mm, 600mm and 900mm Tuff Posts.
- Cast-In-Cages come in Galvanised or 316 Stainless Steel options.
- Energy absorbing.
- Tall enough to extend over garden beds, parapet walls, solar panels, air conditioning systems etc.
